TOMAR

RECT13

Mini LED warning light

TOMAR's RECT-13LS is an ultra mini, ultra high intensity, LED warning light with huge punch. Made of optical Lexan and hermetically sealed, this one piece, fit anywhere design makes installation a breeze. At only 3.3" x 1.1" x .75" the RECT-13LS is one of the smallest warning lights on the market to meet SAE J845, SAE J595 and CAL Title 13 specifications.

The RECT-13LS's compact size makes it the perfect auxiliary light for all the hard to fit locations. Mount directly to the body, the rearview mirror, grille or the license plate. A complete line of brackets means you can mount this light practically anywhere.
